

# Senior Design 2015-16

## Final Presentation – Guidelines

### Format

- All fonts must be clearly readable when presented and in the print-out presented to the committee members (four slides per page – horizontal layout).
  - Do not use white, yellow or fluorescent colors for writing or for plot lines.
  - Use light background and dark font in all figures and diagrams.
  - Include slide numbers at bottom right of the slide.
  - Submit as a PDF to [cce-sd-2015@drexel.edu](mailto:cce-sd-2015@drexel.edu)
- 

**Must not exceed 15 min of uninterrupted presentation time.**

---

The following details must be covered by your document:

1. Problem statement
  2. Proposed solution.
  3. System block diagram.
  4. High level labeled circuit diagram for the projects that have electric or electronic components (including those that have simple implementations of an Arduino or Raspberry Pi).
  5. List all standards and regulations the project has to comply to and the various standards, met by your final implementation..
  6. List and present (highlighting and differentiating), clearly the contributions made by the senior design group, the Graduate Student Researchers involved, etc.
  7. Testing and validation results.
  8. Societal impact of your project
  9. Clear time line showing the dates for the start and completion for major segments of your project.
  10. Out of pocket budgets involved in completing your project.
  11. Acknowledge any funding source (organizations) that, has contributed to your project.
- 

All groups must have a demo prepared. (All video demonstrations must be full screen and well edited – DO NOT SHOW LAST MINUTE SHAKEY RECORDINGS AS DEMO)
